CHINESE ASTRONOMY AND ASTROPHYSICS
VOL. 14 (1990)

SUBJECT INDEX

General Relativity
A new mechanism of releasing gravitational energy in curved spacetime / *LI Yuan-jie* 129

A new solution of the problem of the precession of Mercury / *FU Yu-hua* 207

Observational Cosmology
The second and third moments of Abell clusters and their three-point correlation function /*JING Yi-peng* and *ZHANG Jia-lü* 102

Objective prism survey of QSO candidates in the field centered at 00^h00^m $+00°00'$. Paper V. Discussion of survey results (Abstract)/*ZHAN Yin* and *CHEN Jian-sheng* 117

Cross-correlation analysis of the large-scale distribution of galaxies with different luminosities /*XIA Xiao-yang, DENG Zu-geng, LIU Yong-zhen* and *DAI He-jun* 241

Evidence for evolution in the clustering of quasars / *ZHU Xing-fen* and *CHU Yao-quan* 371

Periodic redshift distribution of quasars associated with low-redshift galaxies / *ZHU Xing-fen* and *CHU Yao-quan* 429

Radio Galaxies
Radio studies of giant radio galaxy 3C 236 at 326.5 MHz / *ZHAO Ren-yang* 256

Physical Processes
Correlations between the broad line cloud temperature of 3C 273, the Lyman-alpha intensity and the uv spectral index / *CHENG Fu-hua, YOU Jun-han* and *YAN Ming* 53

Diffuse cosmic gamma rays in double leaky box model / *ZHOU Da-zhuang* 248

The neutrino in the primordial magnetic field / *SHI Zui-jian, LI Shuang-jiu, KANG Wen-xiu* and *LI Pei-lian* 461

Gamma-Ray and X-Ray Astronomy
The energy spectrum of Cygnus X-1 /*MA Yu-qian, LI Guang-hua, ZHANG Cheng-muo, QIAN Yue-min, XIAO Qian-yi, LU Zhu-guo, WU Mei, DAI Chang-jiang, LI Ti-pei, GU Yi-dong* and *ZHANG Xi-yuan* 1

Properties of the 1979 March 5 gamma-ray burst source / *GUO Qiu-shuang* and *SHI Tian-yi* 148

Absorption of gamma rays by X-ray photons around Cygnus X-3 / *LI Ti-pei, WU Mei* and *TANG Xiao-ping* 473

Pulsars

Pulsed gamma-rays from PSR 1951 +32 / *LI Ti-pei, LI Jing-dong, MA Yu-qian* and *WU Mei* 10

The high order relativistic effects in millisecond pulsar timing / *LIU Jia-qiu* and *XU Chong-ming* 91

Discussion about the galactocentric distribution of pulsars (abstract) / *WU Xin-ji* and *D. A. Leahy* 116

PSR 1820-11: a binary gamma-ray pulsar / *LI Ti-pei* and *WU Mei* 356

Supernovae and Remnants

A binary model for SN 1987 A and the hard X-ray excess / *LIU Chao, ZHEN Xiao-ping, YANG Lan-ping* and *YANG Pi-bo* 227

An interpretation of the semi-circular structure of the supernova remnant CTB-109 / *NI Chen-ping, WANG Zhen-ru* and *QU Qin-yue* 422

Galactic dynamics and Kinematics

The gravitational collapse of a non-uniform spheroid / *HE Nan* and *YUE Zeng-yuan* 136

Proper motion determination and membership study of the open cluster NGC 2286 / *ZHAO Jun-liang, HE Yan-ping* and *TIAN Kai-ping* 346

Binaries

Statistical study of semi-detached and near-contact semi-detached binaries / *ZHAI Di-sheng, ZHANG Xiao-yu* and *ZHANG Rong-xian* 40

The absolute dimensions of the contact binary AW Ursae Majoris /*LIU Qing-yao, YANG Yu-lan, ZHANG Yun-lin* and *WANG Bi* 175

Photometric solutions and analysis of the Algol-type binary CI Aurigae /*LIU Xue-fu, LI Zhi-an, K. C. Leung* and *TAN Hui-song* 167

A photometric and radial velocity study of the double-line eclipsing binary CG Virginis / *SHEN Liang-zhao, LU Wen-xian* and *JIANG Zhao-ji* 273

Revised spectroscopic orbits of HD 144515 and HD 178428 / *LU Wen-xian* 282

Photoelectric photometry of the early-type semi-detached binary UW Orionis / *ZHANG Rong-xian, ZHAI Di-sheng, ZHANG Ji-tong, ZHANG Xiao-yu* and *LI Qi-sheng* 298

A CCD light curve of the cataclysmic eclipsing binary PG 0027+260 / *LI Yong, JIANG Zhao-ji, CHEN Jian-sheng* and *Wei Ming-zhi* 359

A combined photometric and spectroscopic solution for AA Ursae Majoris / *WANG You-ru* and *LU Wen-xian* 389

Spectroscopic orbits of eclipsing binaries: WX Cancri / *LU Wen-xian* 397

A spectroscopic orbit for the two-spectrum eclipsing binary RT Persei / *LU Wen-xian* 437

A CCD light curve of PG 0818 +513 / *CHEN Jian-sheng, WEI Ming-zhi* and *LIU Xiao-wei* 469

Infrared Sources

Observations of the infrared source in S 140 and the heating of the associated gas / *WU Yue-fang, SUN Jin, MAO Xin-jie* and *LI Shou-zhong* 381

A search for infrared objects in the Ara region / *XIAO Zhen* and *LI Jing* 289

Solar Observations

Observation of magnetic and velocity fields of enhanced network on the Sun / *LI Jing, AI Guo-xiang, ZHANG Hong-qi* and *HAN Feng* 18

Spectral characteristics of HeI 10830 A line in the quiet chromosphere / *YOU Jian-qi, WANG Chuan-ji* and *LU Jing* 59

Fractal dimension and prediction of the sunspot number / *SHEN Mei* and *YANG Cai-pei* 191

Determination of correction to the standard solar radius */WAN Lai, ZHAO Jun-liang, CHU Zong-yuan, WANG Ru-you, TAN Zhi-xiang, ZHAO Gang* and *CHENG Zong-yi* 213

Two-dimensional power spectrum of small-scale magnetic fields on the quiet Sun (abstract) / *WANG Jing-xiu, SHI Zong-xian* and *LIU Jian-qiang* 240

Spectral analysis of the 1984 October 18 Solar Prominence / *HU Ju, ZHANG Qi-zhou, FANG Cheng* and *YE SHI-hui* 262

Variation of the azimuth of sunspot magnetic field with depth / *YE Shi-hui* and *JIN Jie-hai* 317

Fast appearances and disappearances of weak internetwork magnetic fields / *SHI Zhong-xian, WANG Jing-xiu, LIU Jian-qiang, HAN Feng* and *LIU Gui-lin* 325

A study on the asymmetries in flare lines / *GAN Wei-qun* and *FANG Cheng* 413

Solar Physics

Magnetic diffusion instability and the fine structures of solar active regions / *ZHOU Dao-qi, QIAN Jing-kui* and *AI Guo-xiang* 26

Solar meter noise storm: a whistler model / *LIU Xu-zhao* 119

An analysis of the formation in magnetic field and the formation depth of seven solar photospheric FeI lines. (I) / *SONG Wei-hong, AI Guo-xiang, ZHANG Hong-qi* and *LI Xiao-chang* 155

The stability of electric current sheets /*ZHENG Hui-nan* and *HU You-qiu* 180

Circular oscillations around the foot of surges / *ZHANG Hong-qi*, *CHEN Ji-min* and *SONG Mu-tao* 338

An accurate solution in magnetic shearing dynamics / *SONG Mu-tao* and *S. T. Wu* 402

Comets

Comet Ge-Wang / *GE Yong-liang*, *WANG Qi* and *HAN Tao* 112

Spectral line identification of the Comet Halley in March-April, 1986 /*WU Guang-jie*, *LI Yu-lan*, *LI Jiu-kang* and *SHI Wen-min* 234

The Planets

On the internal energy source of the large planets / *WANG Hong-zhang* 361

Celestial Mechanics

Automatic computer evaluation of general perturbation for Flora asteroids. I. The Hansen method / *HE Miao-fu* and *ZHANG Jie* 306

Fundamental Astronomy

ERP (SHA) 87L01-an earth rotation parameter series from Lageos data / *ZHU Wen-yao*, *FENG Chu-gang*, *ZHANG Hua* and *TENG Zhan-ming* 75

Spectral analysis of the drag-like coefficient C_D from LAGEOS data /*XU Hua-guan* and *ZHU Yuan-lan* 198

Optical positions of 3C 273 /*WANG Shu-he*, *XU Tong-qi* and *LU Pei-zhen* 449

Reduction Methods

An improvement on the star-pair method for determining telescope field distortion / *LI Chun-lin* and *LI Dong-ming* 444

A "division" treatment of the sky background in CCD images / *WU Guang-jie* 454
